

SAM Solutions

SAM Analytic Solutions specializes in secured IT, data management and analytics, and cybersecurity services for manufacturers, industry corporations and institutions. Led by a PhD from MIT, the company is effective in efficiently analyzing complex data security problems and well-versed in developing, implementing and securely managing data and technology solutions that protect, and maximize the value of critical operations and process controls.

Founded in 2009, SAM Analytic Solutions is headquartered in Durham, NC, providing IT and data security services to clients all across the US and beyond. The company is a trusted, well-respected provider of secured information services to businesses and institutions in order to help them securely manage vital assets, achieve efficiency and organizational success.

SAM Analytic Solutions features a team of knowledgeable and experienced IT engineers and security professionals dedicated to increasing security posture and hardening vital data management security policies, and methods in order to help manufacturers, industrial corporations and institutions stay one step ahead of hackers and other threats designed to bring down critical systems.
